

REACH - European Directive on Chemicals

On 1st June 2008 the Reach Directive on pre-registering all chemical substances, preparations and products came into effect.

FÖRCH GmbH, as a “downstream user”, requires all suppliers/manufacturers to register all preparations/chemical products intended for delivery to us, in line with the Reach Directive. We can thus assure you that FÖRCH GmbH is complying with the Directive.

From 2009 all pre-registered substances will be definitively registered, with a transition deadline of between three and a half and eleven years according to the manufactured/imported quantity.

Based on this, the Material Safety Data Sheets (MSDS) will have to be extended. However we can only do this when we have the data from the producer/manufacturer.

As our customer, you can be assured that FÖRCH GmbH will implement REACH in its entirety and that you will continue to receive your high quality chemicals at the standards to which you are accustomed.
